

Pre Lab Questions

1. Where is DNA stored within the cells of strawberries?
2. Are strawberries the only food that has DNA? Name some food items you ate today that have DNA.
3. What is the shape of DNA who are the scientists who discovered its shape?

During the Lab

Follow along using the procedure in the video.

Post Lab Questions

1. If DNA is too small to see, then why were we able to see the DNA at the end of the experiment?
2. Describe how the DNA looked after you extracted it?
3. What is one variable you could change in this experiment? Do you think the end result would be the same?
